# Mathematics test Paper 1 Calculator not allowed

Please read this page, but do not open your booklet until your teacher tells you to start. Write your name and the name of your school in the spaces below.

First name	
Last name	
School	

#### Remember

- The test is 1 hour long.
- You **must not** use a calculator for any question in this test.
- You will need: pen, pencil, rubber and a ruler.
- Some formulae you might need are on page 2.
- This test starts with easier questions.
- Try to answer all the questions.
- Write all your answers and working on the test paper do not use any rough paper. Marks may be awarded for working.
- Check your work carefully.
- Ask your teacher if you are not sure what to do.

For marker's use only

# Instructions

#### Answers

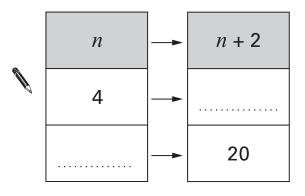

This means write down your answer or show your working and write down your answer.

## Calculators

You **must not** use a calculator to answer any question in this test.

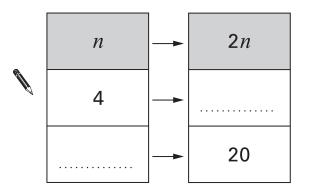

**1.** (a) A function maps the number n to the number n + 2Complete the missing values.

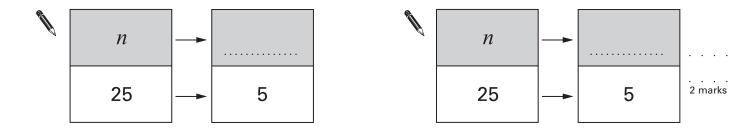

1 mark

(b) A different function maps the number *n* to the number 2*n*Complete the missing values.

. . . 1 mark

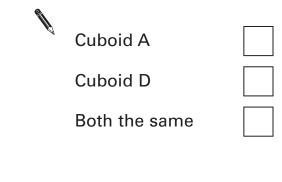

(c) Many different functions can map the number 25 to the number 5Complete the tables by writing two **different** functions.

#### 2. You can make only four different cuboids with **16 cubes**.

	C	Dimensior	IS
Cuboid A	1	1	16
Cuboid B	1	2	8
Cuboid <b>C</b>	1	4	4
Cuboid <b>D</b>	2	2	4

(a) Which of the cuboids A and D has the larger surface area?
 Tick (✓) the correct answer below.

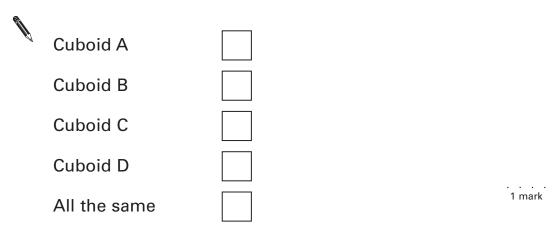

Explain how you know.

1 mark

(b) Which cuboid has the largest volume?

Tick ( $\checkmark$ ) the correct answer below.

. . . . . . . . .

. . . .

(c) How many of **cuboid D** make a cube of dimensions **4** × **4** × **4**?

(d) You can make only six different cuboids with 24 cubes.

Complete the table to show the dimensions.

Two have been done for you.

			D	imension	IS
	Cuboid	E	1	1	24
	Cuboid	F	1	2	12
Ø	Cuboid	G			
	Cuboid	н			
	Cuboid	I			
	Cuboid	J			

. . . .

1 mark

3 marks

### **3.** The shapes below are drawn on square grids.

	shape <b>A</b>	hape <b>B</b>	shape C
(a)	ls shape <b>A</b> an <b>equilate</b> Yes Explain your answer.	r <b>al triangle</b> ? Tick (✔) Yes o	r No.
(b)	ls shape <b>B</b> a <b>kite</b> ? Yes Explain your answer.	No No	
(c)	Is shape <b>C</b> a <b>square</b> ? Yes Explain your answer.	No	

. . . . 1 mark

. . . . 1 mark **4**. Write the missing numbers in the table.

The first row is done for you.

First number	Second number	Sum of first and second numbers	Product of first and second numbers
3	6	9	18
5	-3		
-8		-5	

. . . . 1 mark

. . . . 1 mark

# 5. (a) Calculate $\frac{5}{6} \times \frac{3}{5}$

Show your working.

Write your answer as a fraction in its simplest form.

. . . . 2 marks

(b) Four-fifths of the members of a club are female.

Three-quarters of these females are over 20 years old.

What fraction of the members of the club are females over 20 years old? Show your working.

. . . .

2 marks

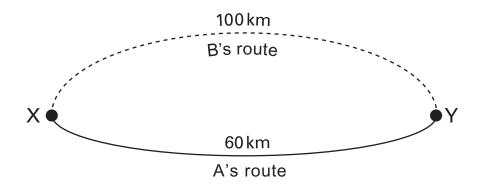

6. (a) Rearrange the equations.

Ø	b + 4 = a	<i>b</i> =	 1 mark
	4d = c	<i>d</i> =	 1 mark
	m - 3 = 4k	<i>m</i> =	 1 mark

(b) Rearrange the equation to make *t* the subject.Show your working.

$$5(2 + t) = w$$

 Two people, A and B, travel from X to Y along different routes.
 Their journeys take the same amount of time.

B travels at an average speed of 40 km/h.

What is A's average speed?

Show your working.

..... km/h

. . . . 2 marks **8.** (a) Ring the expression below that is the same as  $y^2 + 8y + 12$ 

(y+3)(y+4) (y+7)(y+1)

(y+2)(y+6)

(y+1)(y+12) (y+3)(y+5)

1 mark

(b) Multiply out the expression (y + 9)(y + 2)Write your answer as simply as possible.

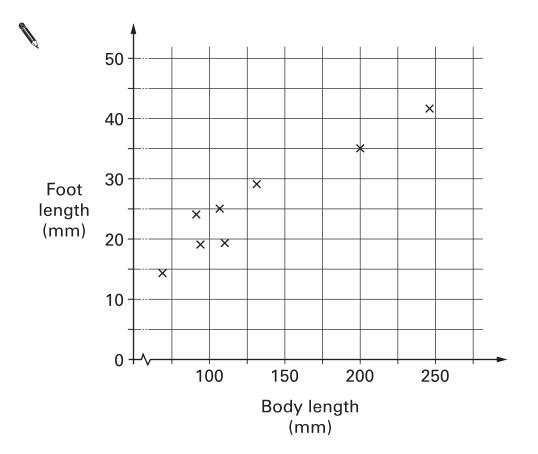

. . . .

2 marks

1 mark

1 mark

**9.** The scatter graph shows the average body length and average foot length of different species of rodents.

- (a) What does the scatter graph tell you about the type of correlation between the body length and foot length for these rodents?
- (b) Draw a line of best fit on the scatter graph.
- (c) If body length increased by 50mm, by approximately how many millimetres would you expect foot length to increase?

Ring the correct value below.

 1 mark	275	50	15	7	2	
I Mark						

(d) An animal has a body length of **228mm**, and foot length of **22mm**.

Is this animal likely to be one of these species of rodents? Tick ( $\checkmark$ ) Yes or No.

Yes	No
Explain your answer.	

. . . . 1 mark

**10.** I have two fair 4-sided dice.

One dice is numbered 2, 4, 6 and 8

The other is numbered 2, 3, 4 and 5

I throw both dice and **add** the scores.

What is the probability that the total is even?

You **must** show working to explain your answer.

. . . . 2 marks

 In table shows a recipe for a fruit drink.
 Type of juice
 Amount

 Orange
  $\frac{1}{2}$  litre

 Cranberry
  $\frac{1}{3}$  litre

 Grape
  $\frac{1}{6}$  litre

Total 1 litre

I want to make  $1\frac{1}{2}$  litres of the same drink.

Complete the table below to show how much of each type of juice to use. Show your working.

Type of juice	Amount
Orange	litre
Cranberry	litre
Grape	litre
	Total $1\frac{1}{2}$ litres

#### **12.** Think about triangles that have

a perimeter of 15cm,

two or more equal sides,

and each side a whole number of centimetres.

Prove that there are only four of these triangles.

You do not need to construct the triangles.

. . . .

. . . .

. . . . 3 marks **13.** The table shows data about births in the UK.

Year	Number of births
1910	1.05 × 10 <sup>6</sup>
1920	1.13 × 10 <sup>6</sup>
1930	7.69 × 10 <sup>5</sup>
1940	7.02 × 10 <sup>5</sup>
1950	8.18 × 10 <sup>5</sup>
1960	9.18 × 10 <sup>5</sup>
1970	9.04 × 10 <sup>5</sup>
1980	7.54 × 10 <sup>5</sup>
1990	7.99 × 10 <sup>5</sup>

(a) In which year was the number of births the highest?

. . . . . . . . . . . . . . . . . .

1 mark

. .

. . . . 2 marks

(b) How many more births were there in 1990 than in 1980?Show your working and write your answer in standard form.

N

**14.** (a) Look at these equations.

$$48 = 3 \times 2^a \qquad 56 = 7 \times 2^b$$

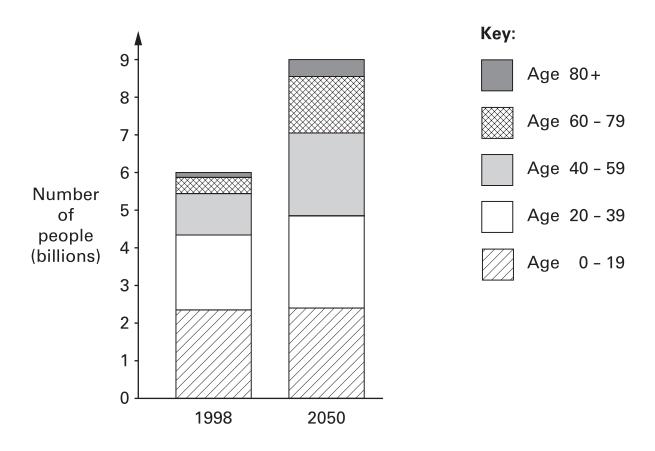

What are the values of a and b?

(b) 
$$48 \times 56 = 3 \times 7 \times 2^{C}$$

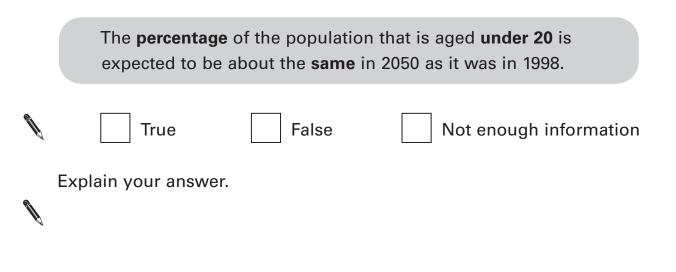

What is the value of *c*?

. . . . 1 mark 15. The chart shows the ages of the world's population in 1998.It also shows a prediction of the ages of the world's population in 2050.

(a) Use the information in the chart to decide if the statement below is true or false or if there is not enough information to tell.

1 mark

(b) Approximately, what is the expected percentage increase from 1998 to 2050 in the total world population?

. . . 1 mark

(c) **Approximately**, what is the expected percentage increase from 1998 to 2050 in the number of people who are aged **60 or over**?

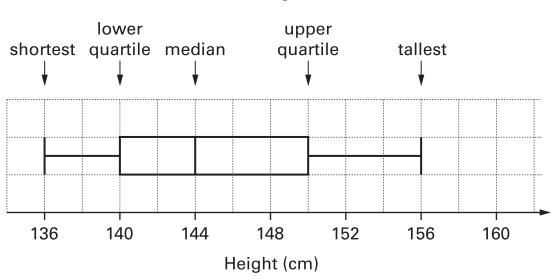

. . . 1 mark

 (d) Using your answers to part (b) and part (c), write a sentence about the expected change in the ages of the world's population from 1998 to 2050.

> . . . 1 mark

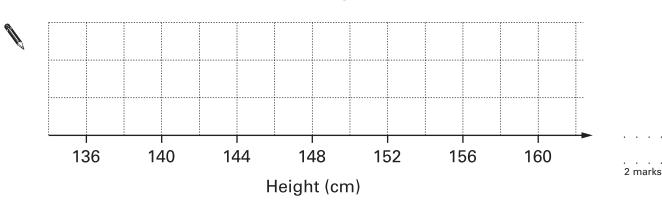

16. A pupil recorded the heights of all the girls in year 7She summarised her results, then drew this box plot.

Year 7 girls

The pupil compared the heights of year 7 boys with year 7 girls.

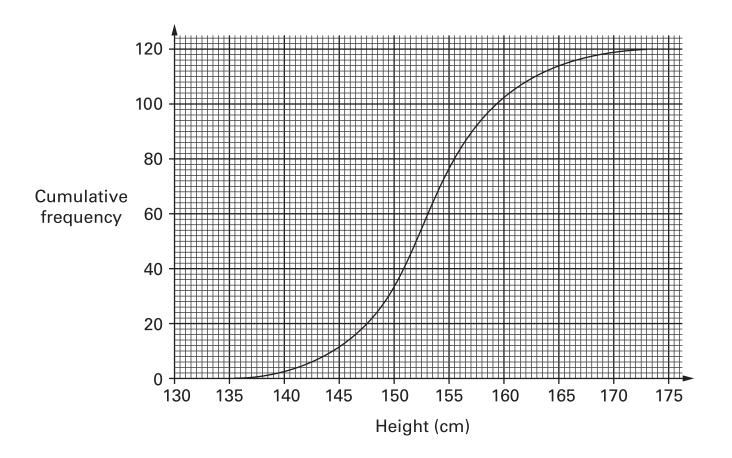

- the shortest boy was the **same height** as the shortest girl;
- the range of boys' heights was greater than the range of girls' heights;
- the inter-quartile range of boys' heights was smaller than the inter-quartile range of girls' heights.
- (a) Draw what the box plot for boys could look like.

Year 7 boys

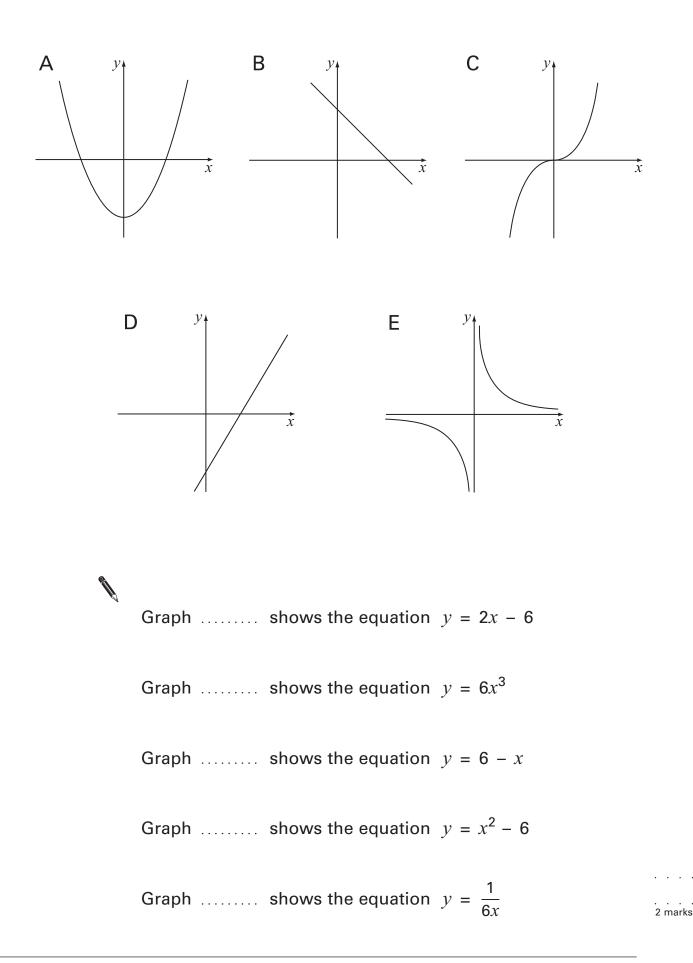

There are 120 girls in year 9

The cumulative frequency diagram shows information about their heights.

(b) Compare the heights of year 9 girls with year 7 girls.

**17.** Match each graph to the correct equation.

**18.** I start with any two **consecutive integers**.

I square each of them, then

I add the two squares together.

Prove that the total **must** be an **odd** number.

. . . . 3 marks

# **END OF TEST**
